BEATRICE SCHEMBRI
JUNIOR BACKEND DEVELOPER

Living in different countries has given me the chance to gain experience in a variety of jobs and to keep challenging myself. Being organized, flexible, quick to learn and open to communication are the skills I mostly rely upon.

I joined an intensive bootcamp to reskill as junior developer. I have been focusing on **backend tools and frameworks**, with the goal of specializing in software development. My mission is to contribute to a more accessible, sustainable, and fairer world by building efficient solutions, bit by bit.
